Gary –

Thanks for your call today. Yes, I did set up a quick and dirty San Jac page a while back, when there was a particular flurry of activity. A link under Hot Topics on the Texas state page was wanted. All it does is link to the news release and the SF site page.

The TX state page is here: <https://www.epa.gov/tx>  
When you click on San Jacinto under Hot Topics, you go here:  
<https://www.epa.gov/tx/san-jacinto-river-waste-pits-superfund-site>

Creating a separate San Jac page to post documents is problematic, as you know. If you can give me a bit more information about what is wanted, perhaps I can help.
